

# Carbon neutral shipping

Ready to try carbon neutral shipping for no extra cost? Book Flock Freight's net-zero shared truckload (STL) service: **FlockDirect**.

## How FlockDirect works

- > All FlockDirect freight travels via smarter, safer, and faster [shared truckload shipping](#), slashing greenhouse gas emissions by up to [40%](#) per shipment with hubless transit.
- > Then, Flock Freight erases each shipment's remaining impact (for no additional cost) through a carbon offset program in partnership with [Carbonfund.org](#).

## Let's solve the freight industry's emissions problem

If all **less-than truckload (LTL)** shipments traveled via FlockDirect for one year, this would be equivalent to:

Taking 14.2 million cars off the road

If all **truckload (TL)** shipments that move with empty space traveled via FlockDirect for one year, this would be equivalent to:

Saving 1.7 billion gallons of fuel

# Frequently asked questions (FAQs)

## Which shipments qualify for FlockDirect?

- Shipments that measure 8-44 linear feet, 4-22 pallets, and less than 36,000 pounds.

## Will FlockDirect help my company achieve its net-zero ambitions?

- Absolutely. With carbon neutral shipping, businesses can easily mitigate their environmental impacts. Read how [Waiākea Water](#) leverages FlockDirect to maintain its Certified Carbon Neutral® status.

## Do other companies offer carbon neutral shipping?

- Other businesses charge a fee for carbon neutral shipping, but Flock Freight is the **first and only** logistics provider to offer over-the-road carbon neutral shipping for no extra cost.

## Why did Flock Freight decide to make FlockDirect carbon neutral?

- We believe sustainable change benefits everyone – shippers, carriers, consumers, and the planet. Achieving carbon neutrality isn't only in alignment with our [B Corp](#) values; it's a global trend that's here to stay.

## Who pays for the carbon credits that offset each FlockDirect shipment?

- We do – shippers don't pay a cent.

## Which sustainability projects do the carbon credits support?

- Each FlockDirect shipment supports Carbonfund.org's [Truck Stop Electrification Project](#), which builds [IdleAir](#) rest stations across the country. At these locations, drivers can access all of their cab's electric functions during rest periods without idling their engines, resulting in less fuel waste and better sleep for drivers.

## Can you provide proof that my shipments are carbon neutral?

- Carbonfund.org records the serial number of each carbon offset that Flock Freight purchases. As a result, Carbonfund.org can send letters of verification to FlockDirect customers as proof of their emission-free shipments.
